

# Senior Design: Week Two Progress Report

Team 3: Micheal Frith, David Larribas, Devin Moore, Benjamin Smith

## 1 GROUP TIME SYNOPSIS

**Current Group Leader:** Ben Smith

### 1.1 Team efforts and overall status

THE interaction with the instructors was useful in the second week. They allowed the group to narrow our focus in both societal problem and design feature set. The societal problem of health and wellness is adversely affected by the level of physical activity within the society. We are delivering an engineering solution that addresses inactivity as a particular cause to societal health and wellness. The narrowed focus allowed a more concrete feature set to be developed in this weeks assignment. The development of this engineering specification went much more smoothly than the problem statement. Everyone will be relieved to finalize the technical feature set this upcoming week.
